

Technical Data

Rated power	350W
Rated wind speed	25 knots (12.5m/s)
Cut-in wind speed	7 knots (3.5m/s)
Cut-out wind speed	none
Rotor diameter	1.22 m
Number of blades	3
Rotor blade material	CFRP
Rotor speed	500-1300 rpm
Generator	Permanent magnets
Voltage	12 VDC/ 24 VDC / 48 VDC
Connection	charge regulator
Speed control	passive pitch control
Power control	passive pitch control
Main brake	electro dynamic
Nacelle weight	11.5 kg

Superwind 350 Micro Wind Turbine Generator

Power Curve

Charging Current
